The neurodivers³ Toolkit

Every launch product in one download.

A shelf, not a syllabus — open the piece that matches the problem in front of you.

by Ollie · neurodivers3.co.uk

What you bought

You bought the whole launch set. That does not mean you have to use the whole launch set this week. Please do not turn the bundle into homework. Open the thing that matches the problem in front of you. Leave the rest until it becomes useful.

Dopamine Menu Template

for when starting feels impossible.

Sensory Audit Workbook

for finding the environmental drains you have stopped noticing.

Masking Recovery Pack

for the slump after a heavy mask day.

Burnout Recovery Roadmap

for the longer recovery phase.

Communication Templates Bundle

for when words are expensive.

Neurodivergent Weekly Planner

for weeks where capacity changes by the day.

1-Page Dopamine Menu

the printable quick-start version.

Digital products only. No printed items are included.

Where to start

You are allowed to use one piece and ignore the rest. The bundle is a shelf, not a syllabus.

About neurodivers³

neurodivers³ is a home for honest stories, practical tools, and ideas for making everyday life work better with a neurodivergent brain. I make resources for late-diagnosed and self-identified neurodivergent adults who are tired of being told to try harder at systems that were never built for them. This toolkit is not a clinical tool. It is a practical one. Use what helps; leave what does not.
